Registro do Capicom no Windows 7 (64 bits).

Alguns sistemas que utilizam o certificado digital usam um recurso da Microsoft chamado <u>CAPICOM.DLL</u>.

A seguir estarão 2 procedimentos para o registro do capicom, **Passo 1** e **Passo 2**. Somente faça o **Passo 2** se o **Passo 1** não for efetuado com êxito.

Passo 1:

regsvr32 "C:\Program Files (x86)\Microsoft CAPICOM 2.1.0.2 SDK\Lib\X86\capicom.dll"

4) Copie este comando.

7) Esta tela deverá aparecer confirmando o êxito no registro. Clique em "OK".

Passo 2 (somente faça este procedimento caso o Passo 1 não funcione):

12) Quando a nova janela se abrir, clique com o botão direito do mouse no ícone com o nome de cmd.

18) Quando você apertar "Enter", a mensagem abaixo deverá aparecer dizendo que o registro do capicom foi executado com êxito. Clique em "OK".
